A Christmas Story You Should Read. . . .

When last we saw him it was 1878 and we were only sixteen. The snow was falling silently as he galloped out of our store to join his new master at the Christmas hearth. He was a real beauty with his strong legs, flowing mane and colorful coat . . . a rocking horse meant to gladden a young heart.

Four generations climbed his sturdy frame, rode on his willing back and patted him affectionately. Then, last year, a descendant of his original owner thoughtfully returned him to us. His threadbare mane and faded color hadn't affected his willingness to "ride the range" with a young cowhand, but we felt he had earned his retirement. He is now "out of pasture" in a New York museum, rocking gently to an occasional pat on the head.

He exemplifies our never-ending search for the best in toys. Every year we search the toy-corners of the earth for the new and unusual . . . playthings that will eventually join our time-tested favorites in upholding the tradition of "a package from Schwarz", a phrase that has signified special Christmas morn delight for 91 years!

This year, as you shop with ease through these pages, you will note an especially varied and attractive selection of old standbys and exciting new "finds" . . . at prices no higher than elsewhere . . . each designed to fill the needs of pure joy and creative play and give extra-special 1953 meaning to "a package from Schwarz".

Our warmest wishes for a
HAPPY HOLIDAY SEASON

PLAYSKOOL KINDERGARTEN BLOCKS FOR COMPLETE BLOCK EXPERIENCES

A-B-C KINDERGARTEN BLOCKS — Building Blocks are the most important single tool of play for youngsters from the age of 18 months to 9 years. Through the use of blocks a child can re-create the settings he sees in the grown-up world, and no other media combines such a diversified pattern of enjoyment, as well as educational value. Playskool Deluxe Kindergarten Blocks are made on the approved unit scale (1⅜" by 2¾" by 5½", and multiples thereof). These sets are offered in the finest quality of both hard and soft wood. Hard wood is preferable, of course, and we strongly urge buying the hard wood blocks, as they will withstand years and years of hard play, whether used individually or by groups. Soft wood sets are practical, however, for unsupervised play — where there is only one child—or for limited group play. Soft and hard wood sets are identical in content, dimensions and shapes.
